The following tables were compiled from figures contained in the budget speech of the Minister of Finance Turkmen SSR. It should be noted that in the breakdown of allocations to the national economy the categories "capital investment" and "working capital" represent functional distributions of allocations and are not to be construed as representing additional expenditures from the budget over the allocations to the various branches of the economy. Furthermore, the breakdown of the national economic and social and cultural activities is not necessarily complete and the figures, therefore, do not always add up to the total for these main categories.
